

Bluetooth Keyboard that Fits into Bags

Have you wanted a full size keyboard while using your PDA or notebook when you are out of the office? But found that the standard desktop versions could not fit into your handbag or notebook carrier. Well, Mobis, the peripheral maker for mobile products has the answer – roll up your keyboard and stash it in your bag. The 63-key QWERTY keyboard measures only 128 x 48 x 32mm when rolled up and it weighs a measly 68g. Did we forget to mention that it is Bluetooth enabled? So to power this keyboard, two AAA batteries are required; the specified battery life for typical use is 10 hours. EastGear Pte Ltd (6837-1582) has this keyboard and more to offer the mobile user.

No More Dust, Dirt and Scratches

If you have recently bought a new mobile phone or PDA, you might want to consider investing in a jacket for your handheld device for protection. Check out the Capdase Leather cases, Soft Jacket and Soft Jacket Advance for Mobile Phone/PDA.

The Capdase Leather cases feature innovative and practical designs that look professional and will fit your PDA neatly. If you prefer an overalls-type jacket, the Capdase Soft Jacket for Mobile Phone/PDA will suit you need. It features custom-made shapes that cater for different mobile phone designs. The Soft Jacket is also ultra thin and made of durable silicone rubber that is smooth and soft to touch and provides sufficient protection against dust, dirt and scratches. Best of all, it still provides you with easy access to all your button functions. The Capdase Soft Jacket Advance for Mobile Phone/PDA is the perfect choice if you are using a slide, flip and swivel and twist style mobile phone. It also shares the same durable design of the Soft Jacket with semi rigid frame to keep the jacket in place without hassle. Orisis Asia (6565-6990) distributes these in Singapore.
